INDEX TO VOLUME XXIII

Aberrant cultures of Rhizobium. Abstract..... 65
Acetyl-methyl-carbinol test, An improved reagent for the..... 353
Adolph, Edward F. and Bayne-Jones, Stanhope. Phases of growth in size of bacilli and yeast measured from motion pictures. Abstract..... 14
Aerobacter aerogenes, Two rapid methods for distinguishing between *Escherichia coli* and..... 115
Aerobic form of bacteria, Oxidation-reduction potentials in relation to the growth of an..... 369
Agglutination and dissociation studies with lactobacilli..... 455
Agglutination as a means of differentiating certain types of streptococcus and leuconostoc. Abstract..... 83
—— of hemolytic streptococci. Abstract..... 83
Agglutinin absorption studies on the genus Brucella. Abstract..... 111
Allen, Ethel K. and Allen, O. N. A study of the bacterial fermentation of poi. Abstract..... 63
Allyn, W. P. and Baldwin, I. L. Oxidation-reduction potentials in relation to the growth of an aerobic form of bacteria..... 369
Almon, Lois and Baldwin, I. L. Aberrant cultures of Rhizobium. Abstract. 65
American, The, Type Culture Collection..... 193
Anaerobic microörganisms, An improved method for the cultivation of..... 331
Anderson, D. Q. and Levine, Max. Two new species of bacteria causing mustiness in eggs..... 337
Anderson, J. A. and Hardenbergh, J. G. The deterioration of cream by a lipolytic bacterium. Abstract..... 59
Anomalous, The, behavior of the tubercle bacillus as a Gram-positive organism with high resistance to gentian violet..... 399
Anthracite coal, Bacteria in..... 155
Antibodies, Studies on, IV. The carbohydrate content as a criterion of the suitability of a broth for the culture of pneumococci..... 223
——, ——. V. The use of green bananas in media for the culture of pneumococci..... 235
Antibody formation in animals treated intracutaneously and subcutaneously with killed cultures of *Staphylococcus aureus*. Abstract..... 105
——, The, titer of so-called "normal" adult serum compared to that of convalescent poliomyelitic serum. Abstract..... 102
Antigenic, The, activity of hemolytic streptococci from different types of infection. Abstract..... 82
Anzulovic, J. Venceslav. A study of *Escherichia coli* in ice cream. Abstract. 56
Asparagin, The, and glycerin metabolism of the tubercle bacillus. Abstract.. 35
——, The, and glycerin metabolism of the tubercle bacillus, The biology of the tubercle bacillus..... 281

Atypical (slow) lactose fermenting *B. coli*..... 267
Averaging bacterial counts..... 123
Aycock, W. Lloyd. The epidemiology of poliomyelitis. Abstract..... 100

Bachmann, F. M. and Frost, W. D. Vegetable peptone agar for quantitative work with *Lactobacillus acidophilus*. Abstract..... 39
Bacillus coagulans, Observations on..... 301
Bacteria in ocean waters and sea bottom and their rôle in the cycle of elements in the sea. Abstract..... 42
——, Marine, commonly found on fresh fish..... 349
—— in anthracite coal..... 155
——, Oxidation-reduction potentials in relation to the growth of an aerobic form of..... 369
—— producing trimethylene glycol..... 167
——, Two new species of, causing mustiness in eggs..... 337
Bacterial cells, The growth rate of individual..... 147
—— counts, Averaging..... 123
—— fluorescence, Study of, in various media. II. The production of fluorescence in media made from peptones..... 135
—— mutations. Abstract..... 17
—— variation. Abstract..... 15
Bacteriologic testing of catgut sutures. Abstract..... 108
Bacteriological examination, The selection of a dilution water for..... 355
Bacteriology, The biological approach to..... 1
Bacteriostatic and germicidal effects of cations, Comparative studies on the natural and acquired resistance of certain strains of *Escherichia coli* to the..... 315
Bacterium acidi-proprionici and other lactate-fermenting bacteria of Swiss cheese. Abstract..... 60
Baldwin, I. L. and Allyn, W. P. Oxidation-reduction potentials in relation to the growth of an aerobic form of bacteria..... 369
Baldwin, I. L. and Hofer, A. W. Variations in the infective power among strains of rhizobia. Abstract..... 66
Bananas, green, The use of, in media for the culture of pneumococci. Studies on antibodies, V..... 235
Bayne-Jones, Stanhope and Adolph, Edward F. Phases of growth in size of bacilli and yeast measured from motion pictures. Abstract..... 14
——, —— and Petrilli, Alexander. The process of spore formation in *B. megatherium* as shown by motion pictures. Abstract..... 45
B. coli, Atypical (slow) lactose fermenting..... 267
Beecroft, Ruth and D'Herelle, F. Bacterial mutations. Abstract..... 17
Beta hemolytic streptococci, Milk-borne septic sore throat and scarlet fever and their relation to..... 241
Biochemical, The, characters of human and animal strains of hemolytic streptococci..... 259
Biological, The, approach to bacteriology..... 1
Biology, The, of the tubercle bacillus. II. The asparagin and glycerin metabolism of the tubercle bacillus..... 281

Boak, R. A., Carpenter, C. M. and Mucci, L. A. The effect of fever temperatures on *Treponema pallidum*. Abstract 106
Borman, Earle K. Comparative studies on the natural and acquired resistance of certain strains of *Escherichia coli* to the bacteriostatic and germicidal effects of cations 315
Branham, Sara E. Some problems due to diversity among meningococci. Abstract 93
Breed, Robert S. Report: The work of the Nomenclature Committee of the International Society for Microbiology. Abstract 13
Broadhurst, Jean and Long, Mary Ann. A differential stain for milk examination. Abstract 57
—— and Oram, Jean. Paramecia as a test of bacterial inhibition. Abstract. 48
Brodie, Maurice. The antibody titer of so-called "normal" adult serum compared to that of convalescent poliomyelitic serum. Abstract 102
Brown, J. Howard. The biological approach to bacteriology 1
—— The preservation of bacteria in vacuo. Abstract 44
—— and Paulson, Moses. The appearances produced in blood agar by bacteria of the *Bacterium coli* group. Abstract 38
Brown, L. W. and Baldwin, I. L. The influence of the oxidation-reduction character of the medium on the aerobic growth of certain bacteria. Abstract 56
Brucella abortus in human tonsils. Abstract 112
Bunker, John W. M., Harris, Robert S. and Milas, Nicholas A. The germicidal activity of vapors from irradiated oils 429
Bunney, William Edward. The stability of the toxic principle in diphtheria toxin. Abstract 104
Burkey, Lloyd A. and Sanders, George P. The influence of bacterial growth and acid production on the draining of Swiss cheese in the press. Abstract 61
Butterfield, C. T. The selection of a dilution water for bacteriological examinations 355

California, The, strain of myxoma virus. Abstract 113
Carbohydrate, The, content as a criterion of the suitability of a broth for the culture of pneumococci. Studies on antibodies. IV 223
Carbohydrates, Further studies upon the effect of various, on production of diphtheria toxin with special reference to its flocculating titer and final pH 195
Carriers of *Streptococcus epidemicus*. Abstract 88
Cations, Comparative studies on the natural and acquired resistance of certain strains of *Escherichia coli* to the bacteriostatic and germicidal effects of 315
Changing, The bacteria. Abstract 26
Clock, Ralph Oakley. Bacteriologic testing of catgut sutures. Abstract .. 108
Coagulable, A, sugar-free base for fermentation studies. Abstract 43
Colon-aerogenes organisms in well waters, The interpretation of direct differential counts of 473

Comparative studies on the natural and acquired resistance of certain strains of *Escherichia coli* to the bacteriostatic and germicidal effects of cations.. 315
Comparative, The, growth rates of *Rhizobium meliloti* and *Rhizobium japonicum*. Abstract..... 67
Comparison, A, of different bacteriological counting methods. Abstract... 43
—— between bacterial plate count of and acid development in pasteurized milk at 70°F. Abstract..... 59
—— of different strains of typical and atypical pneumococci and streptococci. Abstract..... 86
Conn, H. J. Nitrogen metabolism of bacteria as affected by colloids and replaceable bases in soil. Abstract..... 77
——, Chairman; Victor Burke, Ivan C. Hall, J. A. Kennedy, Barnett Cohen, Elizabeth F. Genung, Members. Report of Committee on Bacteriological Technic: Progress during 1931. Abstract..... 12
Control, The, of mold on the surface of cheese. Abstract..... 62
Cruess, W. V. and Irish, J. H. Further observations on the relation of pH value to toxicity of preservatives to microörganisms..... 163
Cultural, A, study of the propionic-acid bacteria. Abstract..... 40
Curran, H. R. and Rogers, L. A. Toxonomic study of the acidophilus group. Abstract..... 39

Davis, D. J. Epidemics of septic sore throat of milk origin: Present status of bacteriology and epidemiology. Abstract..... 87
Decomposition, The, of proteins by microörganisms with particular reference to purified vegetable proteins..... 405
Deterioration, The, of cream by a lipolytic bacterium. Abstract..... 59
D'Herelle, F. and Beecroft, Ruth. Bacterial mutations. Abstract..... 17
Dienst, R. B. and Koser, S. A. Some observations on variation of *Bacterium dysenteriae*, Sonne type. Abstract..... 23
Differential, A, stain for milk examination. Abstract..... 57
Dingle, John H. and Weinzirl, John. The asparagin and glycerin metabolism of the tubercle bacillus. Abstract..... 35
—— and ——. The biology of the tubercle bacillus. II. The asparagin and glycerin metabolism of the tubercle bacillus..... 281
Diphtheria toxin, Further studies upon the effect of various carbohydrates on production of with special reference to its flocculating titer and final pH..... 195
Dissociation and the epidemic problem—Some observations from the study of influenza. Abstract..... 25
—— in the spore-forming aerobic group. Abstract..... 30
—— of *Staphylococcus aureus* and its relation to infection and immunity. Abstract..... 34
—— of the meningococcus following cultivation in normal rabbit's blood. Abstract..... 93
—— of tubercle bacilli, particularly B.C.G. Abstract..... 32
—— of the specific protein precipitate of antipneumococcus horse serum, and a comparison with a protein isolated by chemical means from this immune serum. Abstract..... 105

Dissociation studies with lactobacilli, Agglutination and..... 455
Does freezing kill *Cl. botulinum* spores? Abstract..... 47
Domogalla, Bernhard. A comparison of different bacteriological counting methods. Abstract..... 43

Edwards, Philip R. The biochemical characters of human and animal strains of hemolytic streptococci..... 259
Effect, The, of associated growth on the forms of lactic acid produced by certain bacteria. Abstract..... 73
——, The, of alum on horses used for the production of diphtheria antitoxin. Abstract..... 109
——, The, of cell concentration and age of culture upon the mortality of bacteria exposed to alkalinity and heat. Abstract..... 51
——, The, of fever temperatures on *Treponema pallidum*. Abstract..... 106
Effect, The, of temperature upon the rate of growth of *E. coli* in broth. Abstract..... 52
Effects, The, of nonbeneficial nodule bacteria on Austrian winter peas. Abstract..... 69
Eggs, Two new species of bacteria causing mustiness in..... 337
Electrophoretic, The, potential, of *Rhizobium Meliloti*..... 481
Enders, John F. Dissociation of the meningococcus following cultivation in normal rabbit's blood. Abstract..... 93
England, C. W. and Stark, C. N. A note on the use of crystal violet in presumptive tests for water pollution. Abstract..... 36
Epidemics of septic sore throat of milk origin: Present status of bacteriology and epidemiology. Abstract..... 87
Epidemiology, The, of poliomyelitis. Abstract..... 100
Escherichia coli and *Aerobacter aerogenes*, Two rapid methods for distinguishing between..... 115
Escherichia coli, Comparative studies on the natural and acquired resistance of certain strains of, to the bacteriostatic and germicidal effects of cations..... 315
Experimental comparison of the different definitions of death. Abstract... 46

Falk, I. S. Dissociation and the epidemic problem. Some observations from the study of influenza. Abstract..... 25
Falk, K. George, McGuire, Grace, Valentine, Eugenia, and Whitney, Elinor. Studies on antibodies. IV. The carbohydrate content as a criterion of the suitability of a broth for the culture of pneumococci..... 223
——, Valentine, Eugenia, McGuire, Grace and Whitney, Elinor. Studies on antibodies. V. The use of green bananas in media for the culture of pneumococci..... 235
Farrell, Michael A. and Turner, Homer G. Bacteria in anthracite coal.... 155
Fellers, C. R. and Clague, J. A. Souring of dates by yeasts. Abstract.... 63
Felton, Lloyd D. Dissociation of the specific protein precipitate of antipneumococcus horse serum, and a comparison with a protein isolated by chemical means from this immune serum. Abstract..... 105

Ferguson, R. L., Tittsler, R. P. and Lisse, M. W. The electrophoretic potential of *Rhizobium Meliloti*..... 481
Ferry, N. S. Meningococcus antitoxin: Prophylactic and therapeutic tests on monkeys and other laboratory animals. Abstract..... 97
Filterable migrant forms of mammococcus. Abstract..... 27
—— virus carriers. Abstract..... 113
—— forms of the Rosenow streptococcus from anterior poliomyelitis. Abstract..... 29
Fish, fresh, Marine bacteria commonly found on..... 349
Fisher, L. W. and Mellon, Ralph R. New studies on the filtrability of pure cultures of the tubercle group of microörganisms. Abstract..... 18
Five-fold, A, technic for producing the filterable form of *Bacillus phytophthorus*. Abstract..... 29
Flexner, Simon. The 1931 strain of poliomyelitis virus. Abstract..... 100
Flocculating titer and final pH, Further studies upon the effect of various carbohydrates on production of diphtheria toxin with special reference to its..... 195
Fluorescence, The production of, in media made from peptones..... 135
Formation, The, of pulp and paper mill slimes by microörganisms. Abstract. 70
Fothergill, LeRoy D. The specific treatment of influenzal meningitis. Abstract..... 99
Fraser, F. H. and Ross, M. A. The use of chinchilla rabbits for the titration of streptococcal toxin. Abstract..... 84
Frost, W. D. Carriers of *Streptococcus epidemicus*. Abstract..... 88
—— and Bachmann, Freda M. Vegetable peptone agar for quantitative work with *Lactobacillus acidophilus*. Abstract..... 39
Frazier, William C. and Wing, Helen U. Bacterium acidi-proprionici δ and other lactate-fermenting bacteria of Swiss cheese. Abstract..... 60
Further observations on the relation of pH value to toxicity of preservatives to microörganisms..... 163
—— studies on meningococcus toxin. Abstract..... 95
—— —— on the meningococcus with reference to the Shwartzman reaction. Abstract..... 98
—— —— upon the effect of various carbohydrates on production of diphtheria toxin with special reference to its flocculating titer and final pH.... 195

Gentian violet, The anomalous behavior of the tubercle bacillus as a gram-positive organism with high resistance to..... 399
Georgia, F. R. and Poe, Charles F. Study of bacterial fluorescence in various media. II. The production of fluorescence in media made from peptones..... 135
Germicidal effects of cations, Comparative studies on the natural and acquired resistance of certain strains of *Escherichia coli* to the bacteriostatic and..... 315
Germicidal, The, activity of vapors from irradiated oils..... 429
Gibbs, Charles S. Filterable virus carriers. Abstract..... 113

Septic sore throat, Milk-borne, and scarlet fever and their relation to Beta hemolytic streptococci..... 241
Shwartzman, Gregory. Variations in neutralizability of meningococcus toxins, as measured by the phenomenon of local skin reactivity. Abstract..... 95
Sickles, Grace M. Comparison of different strains of typical and atypical pneumococci and streptococci. Abstract..... 86
Single cell isolation, A new and simplified micrurgical apparatus especially adapted to..... 183

Smart, Helen F. A new bacterial species isolated from strawberries. Abstract 41
Smith, Nathan R. The microflora of old volcanic ash with special reference to nitrogen-fixing bacteria. Abstract 75
Snieszko, S. The isolation of thermophilic cellulose fermenting bacteria. Abstract 71
Society of American Bacteriologists, Thirty-third Annual Meeting of the .. 11
Soil, The, plaque azotobacter test for soil deficiency. Abstract 77
Some factors involved in the biological production of acetone and butyl alcohol. Abstract 74
—— general considerations indicating lines of investigation of the mechanism of meningococcus infection. Abstract 90
—— observations on the quantitative occurrence and the mechanism of formation of induced bacteriophage. Abstract 18
—— observations on variation of *Bacterium dysenteriae*, Sonne type. Abstract 23
—— problems due to diversity among meningococci. Abstract 93
—— toxins of scarlatinal streptococci. Abstract 85
Soule, M. H. Dissociation in the spore-forming aerobic group. Abstract .. 30
Souring of dates by yeasts. Abstract 63
Specific, The, treatment of influenzal meningitis. Abstract 99
Spirella Sp.? Isolated from the guinea pig 211
Spray, Robb Spalding. A coagulable sugar-free base for fermentation studies. Abstract 43
Stability, The, of the toxic principle in diphtheria toxin. Abstract 104
Staphylococci, Growth requirement of 437
Stark, C. N. and England, C. W. A note on the use of crystal violet in presumptive tests for water pollution. Abstract 36
——, Stark, P. W. and Gordon, Ruth. Some observations on the quantitative occurrence and the mechanism of formation of induced bacteriophage. Abstract 18
—— and Stark, Pauline. Bacteriophage as a precursive agent in the development of organisms causing ropy milk. Abstract 59
Stark, P. W., Stark, C. N. and Gordon, Ruth. Some observations on the quantitative occurrence and the mechanism of formation of induced bacteriophage. Abstract 18
Starkey, Robert L. and Waksman, Selman A. The decomposition of proteins by microörganisms with particular reference to purified vegetable proteins 405
Stearn, Allen E. and Stearn, Esther Wagner. The anomalous behavior of the tubercle bacillus as a Gram-positive organism with high resistance to gentian violet 399
Stearn, Esther Wagner and Stearn, Allen E. The anomalous behavior of the tubercle bacillus as a Gram-positive organism with high resistance to gentian violet 399
Streptococci isolated from excised tonsils and post-tonsillectomy blood culture. Abstract 90

Streptococci, Milk-borne septic sore throat and scarlet fever and their relation to Beta hemolytic 241
——, The biochemical characters of human and animal strains of hemolytic ... 259
Studies on antibodies. IV. The carbohydrate content as a criterion of the suitability of a broth for the culture of pneumococci 223
—— —— ——. V. The use of green bananas in media for the culture of pneumococci 235
—— on the dissociation of the Brucella group. Abstract 33
Study, A, of *Escherichia coli* in ice cream. Abstract 56
——, A, of the bacterial fermentation of poi. Abstract 63
——, A, of the granular and floccular types of agglutination of *B. typhosus*. Abstract 110
—— of bacterial fluorescence in various media. II. The production of fluorescence in media made from peptones 135

Tatum, E. L., Fred, E. B. and Peterson, W. H. The effect of associated growth on the forms of lactic acid produced by certain bacteria. Abstract 73
Taxonomic study of the acidophilus group. Abstract 39
Thirty-third Annual Meeting of the Society of American Bacteriologists ... 11
Thom, Charles, and Humfeld, Harry. Notes on the association of microörganisms and roots. Abstract 79
—— and Raper, Kenneth. Note upon the distribution of Dictyostelium and other slime molds in soil. Abstract 80
Tittsler, R. P., Lisse, M. W. and Ferguson, R. L. The electrophoretic potential of *Rhizaboium Meliloti* 481
Tonney, Fred O. and Noble, Ralph E. The interpretation of direct differential counts of colon-aerogenes organisms in well waters 473
Trimethylene glycol, Bacteria producing 167
Tubercle bacillus, The anomalous behavior of the, as a Gram-positive orgaism with high resistance to gentian violet 399
—— ——, The biology of the. II. The asparagin and glycerin metabolism of the tubercle bacillus 281
Turner, Homer G. and Farrell, Michael A. Bacteria in anthracite coal 155
Two new species of bacteria causing mustiness in eggs 337
—— rapid methods for distinguishing between *Escherichia coli* and *Aerobacter aerogenes* 115
Tympanitis, infectious, New disease in young rabbits 449
Type Culture Collection, The American 193
Types of bacteria on blood and chocolate agar and the immediate cause of these types. Abstract 36
Typhus fever studies. Abstract 102
Typhus-Rocky Mountain, The, spotted fever group in the United States. Abstract 104

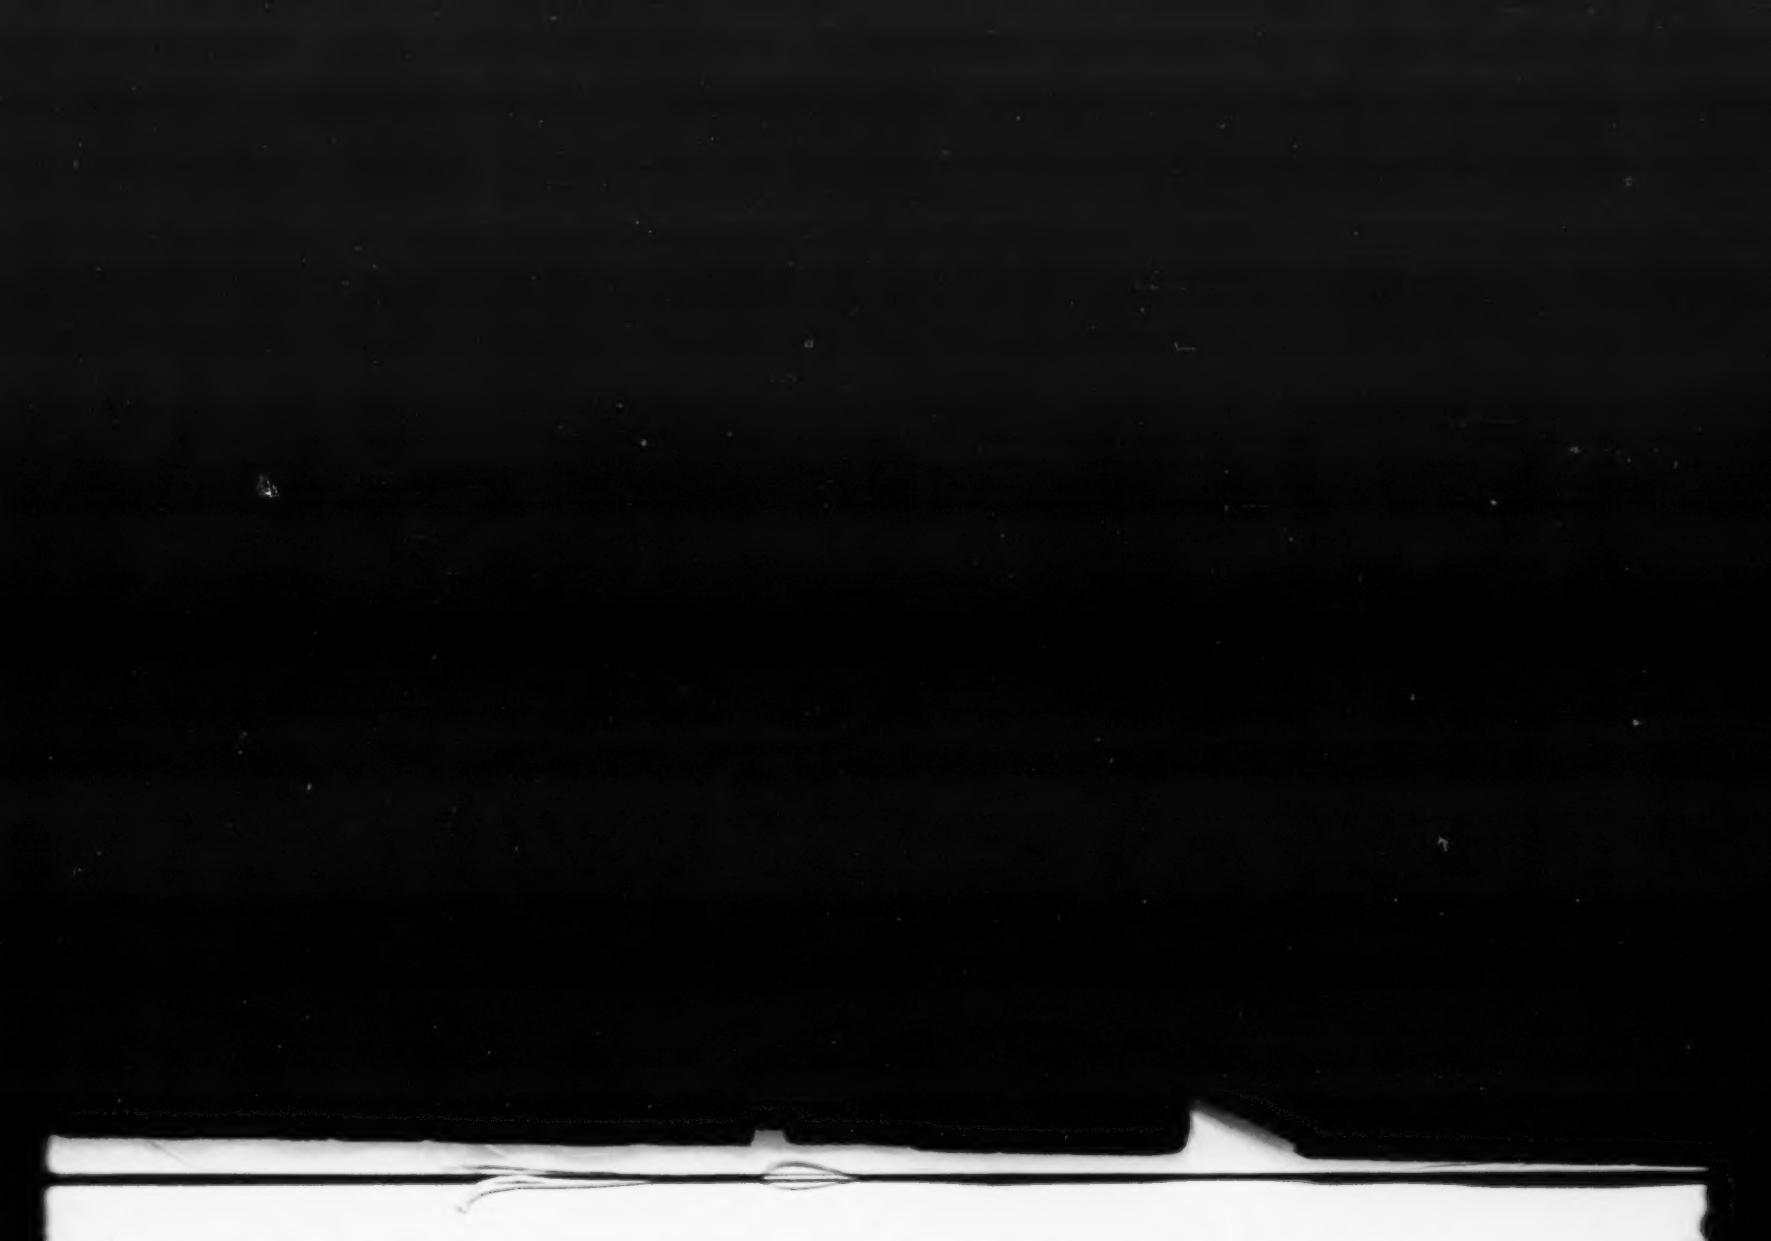
Upton, M. F. and Kopeloff, N. Agglutination and dissociation studies with lactobacilli 455

Use, The, of chinchilla rabbits for the titration of streptococcal toxin. Abstract 84
——, The, of reduced iron in the cultivation of anaerobic bacteria. Abstract. 54

Valentine, Eugenia, Falk, K. George, McGuire, Grace and Whitney, Elinor. Studies on antibodies. V. The use of green bananas in media for the culture of pneumococci 235
——, McGuire, Grace, Whitney, Elinor and Falk, K. George. Studies on antibodies. IV. The carbohydrate content as a criterion of the suitability of a broth for the culture of pneumococci 223
Variations in neutralizability of meningococcus toxins, as measured by the phenomenon of local skin reactivity. Abstract 95
—— in the infective power among strains of rhizobia. Abstract 66
Vegetable peptone agar for quantitative work with *Lactobacillus acidophilus*. Abstract 39
—— proteins, purified, The decomposition of proteins by microörganisms with particular reference to 405

Waksman, Selman A. and Nissen, W. Mushroom nutrition: a group of problems in microbiology. Abstract 81
—— and Purvis, E. R. On the recurrence of microörganisms in peat bogs and their rôle in peat formation. Abstract 76
—— and Reuszer, H. W. Bacteria in ocean waters and sea bottom and their rôle in the cycle of elements in the sea. Abstract 42
—— and Starkey, Robert L. The decomposition of proteins by microörganisms with particular reference to purified vegetable proteins 405
Walker, Harold H. and Winslow, C.-E. A. Metabolic activity of the bacterial cell at various phases of the population cycle. Abstract 53
Walker, R. H., Anderson, D. A. and Brown, P. E. The comparative growth rates of *Rhizobium meliloti* and *Rhizobium japonicum*. Abstract 67
Ward, Archibald R. and Harding, H. A. Comparison between bacterial plate count of and acid development in pasteurized milk at 70°F. Abstract. 59
Water, The selection of a dilution, for bacteriological examinations 355
Waters, well, The interpretation of direct differential counts of colon-aerogenes organisms in 473
Watkins, J. H. and Winslow, C.-E. A. The effect of cell concentration and age of culture upon the mortality of bacteria exposed to alkalinity and heat. Abstract 51
Weinstein, Louis, and Rettger, Leo F. Some factors involved in the biological production of acetone and butyl alcohol. Abstract 74
Weinzirl, John and Dingle, John H. The asparagin and glycerin metabolism of the tubercle bacillus. Abstract 35
—— and ——. The biology of the tubercle bacillus. II. The asparagin and glycerin metabolism of the tubercle bacillus 281
Werkman, C. H. and Gillen, G. F. Bacteria producing trimethylene glycol ... 167
Wheeler, Mary W. The antigenic activity of hemolytic streptococci from different types of infection. Abstract 82

Whitney, Elinor, Falk, K. George, Valentine, Eugenia, and McGuire, Grace. Studies on antibodies. V. The use of green bananas in media for the culture of pneumococci..... 235
——, McGuire, Grace, Valentine, Eugenia, and Falk, K. George. Studies on antibodies. IV. The carbohydrate content as a criterion of the suitability of a broth for the culture of pneumococci..... 223
Williams, Anna W. and Gurley, Caroline R. Milk-borne septic sore throat and scarlet fever and their relation to Beta hemolytic streptococci..... 241
Wilson, M. A. and Riley, C. V. Further studies on meningococcus toxin. Abstract..... 95
Winslow, C.-E. A. The changing bacteria. Abstract..... 26

Youmans, Guy P. and Hoffstadt, Rachel E. Dissociation of *Staphylococcus aureus* and its relation to infection and immunity. Abstract..... 34


Zinsser, Hans and Castaneda, M. Ruiz. Typhus fever studies. Abstract.. 102
